- a. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a first OSB product.

Group II, claim(s) 12-17, drawn to a second OSB product.

Group III, claims 18, 19, 22 and 24, drawn to a method of making a first OSB.

Group IV, claims 20, 21, and 23, drawn to a method of making a second OSB.

The special technical feature (STF) of claim 1 is a OSB having a molar ratio of melamine to formaldehyde as recited by claim 1. The STF is shown in US 6,379,814 which is 2002/054994 shown as a X-reference according to applicant search report dated 12/22/05. Hence, there can be no Unity of Invention when the STF or single inventive concept is shown in the prior art. Thus, Lack of Unity is held by the Primary Examiner under PCT rule 13 and 37 CFR 1.475.

A telephone call was made to Bryan Davidson on 2/5/08, however no election was made.

Any inquiry concerning this communication should be directed to N Edwards at telephone number 571-272-1521.
